

# CAG Patch for MacOS Snow Leopard

1. Please install CAG2.
2. Start Patch for Snow Leopard

---

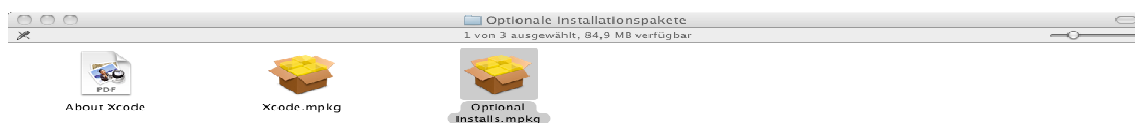

*On some computers the steps 1 and 2 mentioned above are sufficient to run the CAG2. In this case, you can stop here. If not, please pay attention to the following instructions (steps 3-5):*

3. If the Patch reports that X11 is not found, please install it from the Snow Leopard CD-ROM (see the following screenshots; in the list of installation packages under "Programme"/"programms").
